Resident of Bayside,

Collections are one of the most valued services that the Village provides. In fact, in the 2017 Community Survey, 86.7% of residents ranked garbage collection as the most important service and 66.7% of residents ranked recycling collection as the second most important.

In 2018, our DPW crews spent:

- 1,266 hours collecting garbage,
- 674 hours collecting recycling,
- 866 hours collecting yard waste, and
- 234 hours collecting leaves.

During this time, our crew collected:

- 1,186 tons of garbage,
- 541 tons of recycling,
- 6,226 piles of yard waste, and
- 2,985 piles of leaves.

In addition to our normal collections, the Village will once again host a Spring and Fall Clean Up Day, as well as Recycling Days from May through September.

Crews will perform collections on 204 out of 253 working days with 51 of those days consisting of two (2) types of collections in 2020. Roughly 80% of the days that crews spend working consist of collections, while still completing other responsibilities.

The Village understands the importance of collections for maintaining the appearance of the community. It is equally important to perform them efficiently and effectively. We have created this resource guide to inform, educate, and help you on the variations of each collection. We hope you find this as a useful tool to continue the efficiency of Village collections.

Respectfully,

Andrew K. Pederson
Village Manager
